

# Hear what previous participants have to say

“I went into this lab, as a high school graduate, I have learnt so much in my brief time in this lab that I felt like I learnt more in 3 months of the lab than my 2 years in my school learning about computer science.” *Shiroyuki, Jerudong International School (JIS) graduate*

“This internship lab enabled me to actually realize my skills and capability in programming. I have also found what I am truly passionate about programming and want to look in depth in the programming world through the different various assignment and tasks assigned.” *Phan Minh Tri, FPT University*

“This lab provides an excellent way for hard-working individuals who want to develop real world projects. Even though this lab is still new but the training is robust and rewarding.” *Siti Mufassirah, UBD Environmental and Life Science*

“I can definitely see how much I have improved in terms of programming skills and understanding of code. The lab has managed to ignite a spark in my interest for coding which I never knew would ever be possible.” *Muhammad Adid, UBD Computer Science*

## Next session

7 Jan – 27 Apr 2019

**FPT-UBD Innovation Lab**  
Universiti Brunei Darussalam  
BRUNEI DARUSSALAM

### Available topics:

- Full-stack web
- Mobile app dev
- Game dev
- Big data analytic

# FPT-UBD Innovation Lab

Project based training by expert industry mentors

## An intensive 16 weeks software development training

**FPT UNIVERSITY**

# What?

The FPT-UBD Innovation Lab training program is an intensive 16 weeks **full-time** and **part-time** software development training supported by FPT, the largest IT enterprise in Vietnam.

The training is **project-based** begin with fundamental software development concepts and progress to intermediate skills through various projects. Finally, the participants will be involved in a major group project leveraging latest technology.

intensive training

latest technology

team work

expert mentors

tailored levels

job readiness

# Learn from the experts

Have ideas but don't know how to realize?

Want to be a successful technopreneur but lack the skills?

Want to gain software development experience for job opportunity?

# University experience

# Invest in yourself
